**FOR IMMEDIATE RELEASE**

Dec. 2, 2003

### **Vent-A-Hood Announces Production of “Emerald VI” Six-Inch Hood**

Richardson, Texas – Vent-A-Hood, the company that created the modern residential range hood, has announced production of the SJH6K Series “Emerald VI” range hood, specifically manufactured for the middle-market of Americans who want a high-performance range hood that will accommodate standardized six-inch ventilation outlets. The product has been successfully test-marketed and is available for distribution throughout the U.S. and Canada.

“We are embarking on a huge opportunity, providing appliance solutions to more homeowners who are demanding better products and efficiency in average American kitchens,” said Blake Woodall, director of sales for Vent-A-Hood.

Vent-A-Hood is known for manufacturing luxury hoods that require at least a 9-inch ventilation outlet to handle the powerful suction force of the company’s patented Magic Lung® filterless blower and more than 300-1200 CFMs (cubic feet per minute) of air movement, Woodall said. However, the new “Emerald VI” hood will accommodate the standard six-inch ventilation ducts found in everyday residential construction.

“Not every homeowner can afford our custom hoods and the construction modifications that are required for their installation,” Woodall said. “But that shouldn’t mean that consumers have to settle for poor ventilation in their homes.”

Vent-A-Hood’s “Emerald VI” was designed to go over standard cooking equipment and will offer 250 CFMs of quality air movement. Woodall said early customer feedback has been overwhelming.

“This isn’t a product for a professional range that produces high BTUs,” he said. “It’s a product for the vast majority of homeowners who want efficiency, clean air quality, and no lingering odors from their four-burner cook top.”

-MORE-

The “Emerald VI” features an active canopy, halogen lights, and SensaSource that automatically adjusts ventilation power to heat and cooking output. The range hood comes in black, white, biscuit and stainless options and is available in widths of 24, 30, 36 and 42 inches.

“We’re taking luxury performance to a whole new audience with this product,” Woodall said. For more information about the “Emerald VI,” contact Vent-A-Hood at 972-235-5201, or locate your nearest distributor at [www.ventahood.com](http://www.ventahood.com).

About Vent-A-Hood:

Founded in 1933, Vent-A-Hood, based in Richardson, Texas, is the oldest manufacturer of residential range hoods in America. Each product manufactured by Vent-A-Hood is individually engineered for performance in addition to style. Vent-A-Hood products are sold in all 50 states as well as Canada.
