Vent-A-Hood Featured on Cover Photo of This Old House Magazine

Richardson, Texas – Vent-A-Hood, the company that created the modern residential range hood, has an appliance featured on the cover photo of the July/August issue of This Old House magazine now on newsstands.

The magazine's special Kitchen & Bath Issue showcases a stainless steel Euroline Vent-A-Hood on the cover.

"It's one of our most popular models," said Blake Woodall, director of sales for Vent-A-Hood. "It continues to be used in all styles of décor, adapting to a customer's individual color choices and surface textures with ease."

In the cover story, which focuses on kitchen island ideas, the Vent-A-Hood is prominently displayed over a professional-grade range in a casually elegant kitchen with hardwood floors, white custom cabinetry, blue pendant lights and several additional custom amenities.

Woodall said more customers are choosing Vent-A-Hood for their range hoods as the trend toward commercial cooking ranges grows [stainless steel ranges with multiple gas burners and high BTUs]. Vent-A-Hood manufactures products that provide 300-1200 CFMs [cubic feet per minute] of ventilation and contain the patented Magic Lung® blower.
