Vent-A-Hood® Wins ADEX Award

RICHARDSON, Texas – Vent-A-Hood®, the company that created the modern residential range hood, was honored with a 2006 ADEX Award from Design Journal. The ZTH hood, Vent-A-Hood's barrel-shaped contemporary design range hood, received a gold award.

"ADEX is one of the most prestigious award competitions for product design and we are honored the ZTH hood was chosen," said Blake Woodall, director of sales for Vent-A-Hood. "This award recognizes the efforts of our design and marketing departments that strive to create high-quality products that blend function, dependability and style."

The ZTH is a glass front wall mount hood available in stainless steel and features Vent-A-Hood's signature Magic Lung® blower, 300 to 600 CFM, halogen lights and a rounded duct cover. The Magic Lung® is Vent-A-Hood's patented centrifugal blower system that traps all cooking contaminants, liquefies grease vapor and removes heat-polluted air.

Design Journal, the international trade publication for interior designers, architects and facility managers, introduced the Awards for Design Excellence in 1994 as a way of recognizing superior product design. An anonymous panel of professionals representing a cross section of the design industry judges the ADEX Awards based on product form and function.

About Vent-A-Hood:

Founded in 1933, Vent-A-Hood, based in Richardson, Texas, is the oldest manufacturer of residential range hoods in America. Each product manufactured by Vent-A-Hood is individually engineered for performance in addition to style. Vent-A-Hood products are sold in all 50 states as well as Canada.
